OUR *Fiftieth* ANNIVERSARY

THE House of Michell was founded fifty years ago in 1890 when two brothers, Henry F. and Frederick J. Michell, opened a store in a modest 2½-story building at 1018 Market Street, Philadelphia, with four employees on the payroll in addition to the two proprietors.

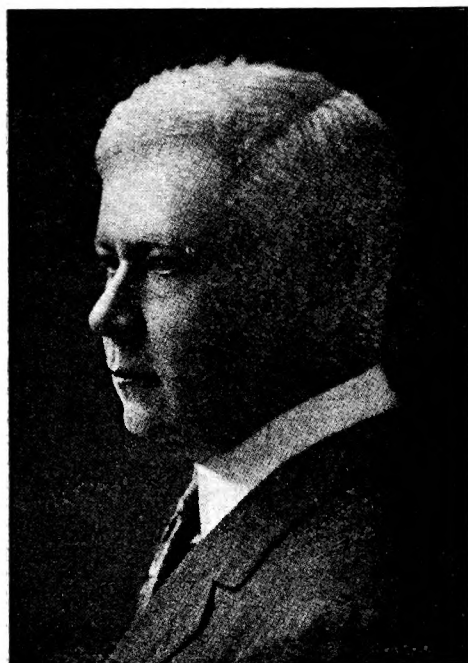

Like most young men going into business for themselves, they started out with high ideals and pledged themselves that "quality" of both merchandise and service would be their first, as well as last, consideration, and for half a century those ideals have never been lowered. This has not been an easy road to follow; it has meant constant attention to details by every member of the organization and a stubborn insistence on quality first, price second.

Our first catalog had 48 pages and was considered to be quite some catalog; this one has 172 pages and its colored illustrations are made from actual photographs of the flowers depicted.

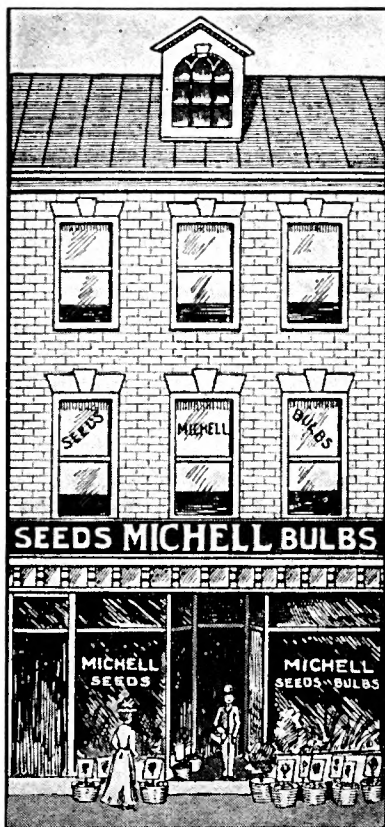

The merchandise and methods of the new firm pleased its customers so well that by 1899 it became necessary to rebuild the store into a five-story establishment, and we find, in going through the records for 1900, that the payrolls carried 80 employees, of whom 11 were commercial travelers who covered all the states east of the Mississippi.

In 1903 the business was incorporated, and in 1906 was departmentalized into eight departments—Flower Seed, Vegetable Seed, Grass Seed, Plant, Bulb, Tool and Implement, Sundry and Florist Supply—with a specialist at the head of each department. This made for even better service and was so appreciated by the public that by 1910 it was necessary to find larger quarters, and property at 518 Market Street, a few blocks farther down town, was bought and remodeled into a modern, up-to-date seed establishment at the remodeling cost of \$50,000.00. Soon after this it became evident that the business was outgrowing its storage space, so in 1912 a large 4-story building on Ludlow Street was secured, and this was occupied until 1918 when growing pains again called for action, and the immense building at American and Dauphin Streets became the Michell warehouse. This great building has four floors of 20,000 square feet each, and a basement, with a private railroad siding running into the building.

In 1922, to relieve the now overcrowded store, the building next door, at 516 Market Street, was purchased and converted into a modern salesroom.

FREDERICK J. MICHELL

1890

1940

Today's personnel of 140 people includes 20 traveling salesmen who look after the wants of large buyers, while the store fills orders from every state in the Union as well as Europe, South America, and other foreign countries.

The scope of the present business can be estimated from the fact that our annual sales of grass seed are around 800,000 pounds, while our Bulb Department handles well over 12,000,000 imported and domestic bulbs. During 1938 the Florist Supply Department imported 20 tons of Ruscus and 75 cases of Statice, just two of the items handled.

Michell's Flower Seed Department is one of the most up-to-date in the United States and supplies the majority of the professional growers with their flower seed requirements. The Sundry Department is the most diversified and complete of its kind anywhere, being able to supply everything that is required for the garden, greenhouse, lawn, nursery, or farm.

Michell's Vegetable Seed Department is one of the most important sections of the business. All the leading varieties, as well as the newer sorts, are constantly checked for reliability and improvement, and the four corners of the earth are searched for varieties of vegetable seed that will be of value to the American gardener.

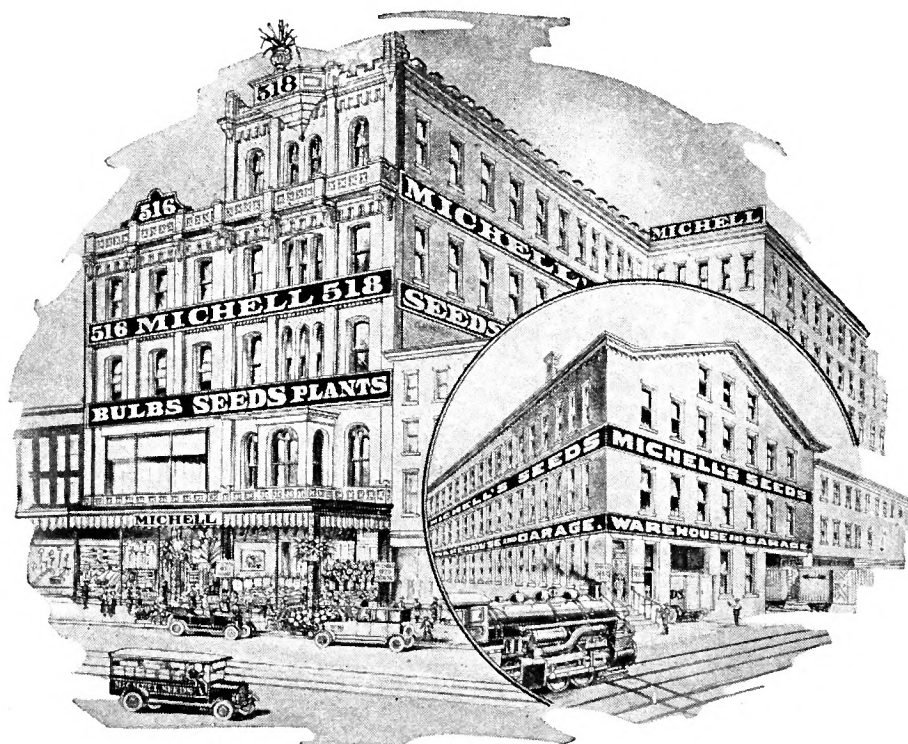

Our vegetable seed expert is constantly testing and searching for improved varieties with greater productiveness and more desirable appearance, so as to assure our trade that the best in vegetable seeds is always available here. All vegetable seed stock, before delivered to the customer, is subjected to a soil-test and a machine-test to insure sturdy growth and purity.

Michell's Plant and Nursery Department is one of the most active sections of the Michell's organization. We are constantly on the alert for new and odd varieties of plants, and we have furnished the gardening trade in this section for the last fifty years with the most desirable and productive in annual plants, perennial plants, trees and shrubbery, as well as a complete assortment of greenhouse and forcing plants of all varieties. Customers can be assured of getting the finest and most reliable sorts of all plants when they care to entrust orders to our care.

Among the novelties that we have introduced are the Helen Michell Geranium, the New Sensation Geranium and the Butterfly Bush, which was one of the largest selling novelties ever introduced and is still in demand with hundreds of gardeners. Only the finest varieties of Roses are offered after they have passed our most critical test for hardiness, productiveness, and blooming qualities.

In addition to the various departments enumerated above, please bear in mind the fact that Michell's Seed House is in a position to furnish everything that the gardener, either professional or amateur, commercial greenhouse grower, large estates, institutions and the golf clubs require for the proper conduct of their business.

The founders have both gone to their reward, Frederick J. passing in 1928 and Henry F. in 1932. The present officers, Frederick J. Michell, Jr., C. F. Schermerhorn, Frank B. Michell, W. G. Arader are sons and sons-in-law of the founders.

Rustproof Antirrhinum • Snapdragon

This strain has proved excellent under extensively wet outdoor conditions. They have stood the tests and are better than 75 per cent rust-proof. For growing outdoors for cutting or bedding, they will prove excellent. Each plant produces from 15 to 18 spikes, which are non-lateral, with flower-heads 10 to 14 inches long. They are of vigorous growth with broad, dark green foliage practically immune from rust.

MICHELL'S EXCLUSIVE GOLDEN JUBILEE INTRODUCTION, QUAKER MAID. This excellent new rustproof Maximum type of Snapdragon is one of the finest large-flowering varieties we have seen. The color is a brilliant rose, with large, open florets which have yellow upper lips, and the tubes are pure white. The individual flowers are well set on good, strong, wiry spikes. This variety will prove excellent for outdoor cut-flowers. The plants are base-branching and produce from six to eight huge long-flowering spikes on which the florets are decidedly well arranged. This is an all-purpose Snap. We cannot recommend it too highly for both bedding and cutting. See color illustration on front cover. Trade pkt. 50c.; \$1.25 per 1/8oz.

ROSALIE, MAJUS GRANDIFLORA RUSTPROOF. Bronze Medal, 1940 All-America Selections. This exciting color is entirely new in Antirrhinums. It is a deep rich rose, with an underlying tone of topaz or amber, giving it a richness which makes it stand out conspicuously among all other colors. The tube and lip are the same color, which greatly intensifies the depth and richness of color. This is a base-branching type, producing many large flower-spikes, with closely set florets. Excellent for cut-flowers and the garden. Trade pkt. 50c.; \$1.00 per 1/8oz.

MICHELL'S NAOMI. This new forcing Snapdragon is a brilliant rose-pink with a light touch of yellow on the upper lip. Its exquisite coloring is even more vivid under artificial lighting. Immense flower-heads, 18 to 24 inches long, carry 75 and over, closely set, large, wide-open florets which measure over 2 inches, making the spike truly a giant. Its stems are heavy and as strong as wire. The keeping qualities are excellent, the spikes lasting in good condition for over a week. We are proud to offer this splendid Snapdragon to our customers with the assurance that it will prove a real money-maker. Trade pkt. (1200 seeds) \$2.00 each net; \$6.00 for 3 trade pkts.

This variety will prove equally good for outdoor cut-flowers as well as greenhouse forcing. 1/2 trade pkt. 60c.; \$1.00 per trade pkt.; 3 trade pkts. \$2.50; 1/8oz. \$3.00.

Aster, Wilt-resistant Early Giant, Rose Marie

Honorable Mention, All-America Selections

Rose Marie is a fascinating, rich, lively shade of rose which is probably the most popular color in Asters. The full flowers have broad, graceful petals, daintily plumed and intertwined, very large (4 to 5 inches in diameter), and similar to Giants of California blooms. The plants grow from 1 1/2 to 2 feet tall, with branches coming low on the central spike, and only 6 to 8 flowers are produced on each plant. One of the most desirable of the new Early Giant Wilt-resistant Asters. Trade pkt. 50c.; \$3.50 per oz.

Ageratum, Midget Blue

Aster, Crego, Enchantress, Wilt-resistant

An entirely new color in Asters—a lovely shade of lively salmon-rose, one of the brightest colors yet developed. The flowers are exceptionally large and of good substance. Plants are branching and free flowering, producing blooms in early September. Trade pkt. 40c.; \$2.00 per oz.

Aster, Early Giant Wilt-resistant, Light Blue

Silver Medal, All-America Selections

The flowers of this strain are very similar to Giants of California—very large and full, with broad, graceful petals, daintily plumed and intertwined. The plants, however, differ considerably from the Giants of California as they are only 1 1/2 to 2 feet high, with branches coming from low on the central spike. They are of very early blooming habit, coming into flower the first week in September. Trade pkt. 40c.; \$2.00 per oz.

Celosia cristata, Royal Velvet

Honorable Mention, All-America Selections

Early-blooming, basal-branching cockscomb type. Extra-large center head of rich ruby-red with velvety texture surrounded by numerous erect branches mounted with medium-sized combs. Plants are about 2 feet high, very uniform and symmetrical in growth. The long-stemmed branches are excellent for cutting, especially for commercial purposes; also for dried winter bouquets. If center head is not desired, pinch out when plant is young. Trade pkt. 50c.; \$1.00 per 1/8oz.

New Centaurea imperialis, Lavender Beauty

Flowers are larger than other Imperialis types and reach a size of 3 to 3 1/2 inches. Heavy lateral branches make cut-flowers possible, and its delicately beautiful color will soon make it a great favorite. An easy-grown annual that blooms over a long period. Trade pkt. 40c.; \$2.00 per oz.

Cosmos, New Double Early Sensation, Mixed

The flowers are equally as large as the regular single Sensation. Two types, fluted and crested. The crested type has a large 2-inch crested center and the fluted are so double they resemble a camellia. Available this season in a mixture only of white, pink, and crimson. Trade pkt. 50c.; \$1.00 per 1/8oz.

Ipomoea (Morning-Glory), Scarlett O'Hara

Gold Medal, All-America Selections

A new early-flowering Morning-Glory. The blooms measure from 3 to 4 inches in diameter and are a vivid scarlet, but lacking the harshness usually found in this color. Although not readily seen, there is just enough orange hidden in the color make-up to give the impression that the blooms are of soft velvet. A very early bloomer. The first flowers will begin to appear in about sixty-five days from seed. Very prolific bloomer, and the flowers remain open all day, even in the warmest weather. Trade pkt. 50c.; \$3.00 per oz.

Marigold, Golden Jubilee

Marigold, Early Dwarf Chrysanthemum-flowered, Golden Jubilee

Michell's Exclusive Introduction for 1940

This new, very early, dwarf, Mum-flowered Marigold grows about 1 1/2 feet high and produces excellent, large, double, Chrysanthemum-like flowers in shades of golden yellow, orange, and light yellow. Fine for bedding or planting in groups in the perennial border. Trade pkt. 50c.; \$3.00 per oz.

New Marigold, Extra-early Dwarf Hybrids, Carnation-flowered

The earliest of all African-type Marigolds. Very free flowering, the color ranging from bright orange to clear lemon, including a number of rich orange shades. It grows to a height of 1 1/2 feet, with many base branches and laterals, all blooming at the same time, producing a mass of color that completely smothers the foliage. The blooms are from 2 1/2 to 3 inches in diameter, of a Guinea Gold type, but with a quilled center. An entirely new and distinct type of Marigold. It will bloom from three to four weeks ahead of the other African Marigolds. Trade pkt. 40c.; \$2.00 per oz.

New Marigold, French Dwarf Double, Harmony Hybrids

This variety comes practically 100 per cent true. The plants grow 12 to 14 inches high, and commence blooming two and a half months after seed is sown. Flowers are of medium size, and the color-range includes innumerable combinations of the popular Harmony Marigold. All the flowers have the familiar crested center, flanked by several rows of broad guard-petals. As a showy garden subject, Harmony Hybrids take first honors and will undoubtedly supersede all other dwarf French types. Trade pkt. 50c.; \$1.25 per 1/4oz.

New Marigold, French Dwarf Double, Spotlight (Harmony Type)

A showy companion to the popular Harmony Marigold, Spotlight, takes its place on the Marigold roll of honor. The plants are about 12 to 14 inches high, very compact, extremely free blooming, and unusually early. At least two weeks earlier than other French varieties. They have the characteristic Harmony flower formation, scabiosa-like, with crested centers of dainty tubular petals in a bright yellow shade which contrasts with the velvety dark mahogany-red guard petals. An excellent type for bedding. Trade pkt. 60c.; \$1.25 per 1/4oz.

New Marigold, Dwarf French, Scabious-flowered, Orbit

This variety grows to a height of 11 inches, is very free flowering, and the compact little plants are excellent for border and bedding purposes. The color is a deep golden yellow with quilled center, with a perfect background of reddish brown guard-petals. The doubles percentage is in the high nineties. Trade pkt. 50c.; \$3.00 per oz.

New Marigold, French Tall Single, Ferdinand (Harmony Type)

Ferdinand is one of the gayest of the new flowers. It is single with a neat, round, crested center of dainty tubular florets in an arresting shade of golden yellow, surrounded by a single row of broad, mahogany-red guard-petals. Flowers are medium size, extremely showy, and attractive. The plants grow from 20 to 24 inches tall, with an upright, semi-compact, full-foliaged growth-habit. The stems are well over a foot in length, making this variety a fine cut-flower subject as well as an attractive and showy garden plant. Trade pkt. 60c.; \$1.25 per 1/4oz.

New Early-flowering Marigold, Winter Harmony

An entirely new quilled scabious type for winter flowering in the greenhouse. The center is a golden orange with a single row of reddish brown guard petals. Very uniform in growth. Height 2 1/2 to 3 feet, producing 100 per cent double 2-inch flowers. Trade pkt. 50c.; \$1.00 per 1/4oz.; oz. \$3.00.

Marigold, Gigantea, Orange Sunset

An outstanding sort. Orange Sunset is one of the foremost varieties of the year. The flowers average 5 inches or more in diameter and are unquestionably the largest Marigolds to date. The color is a deep, rich, lively orange. Flowers are very full, centered with broad, heavy, wavy petals which gracefully overlap to make them ideal not only for garden decoration but for cut-flower use as well. Trade pkt. 50c.; oz. \$2.50.

Marigold, New Sunrise

An early-blooming form of Dixie Sunshine. The flowers are large and ball-shaped, composed of dozens of tiny petals gracefully interlocked and daintily fringed in effect. The color is a rich brilliant golden yellow and most important is the fact that Sunrise comes 100 per cent true. The plants are tall and bushy. Trade pkt. 40c.; \$2.00 per oz.

VIOLET-BLUE. (Dwarf Single.) New. The grand color of this new Petunia is a rich violet with a bright blue cast. The plants are uniform, symmetrical, and compact in habit. A decidedly neat plant that will hold its fine habit throughout the season. Its clean, dark foliage is hardly visible due to the great number of rich violet-blue flowers. $\frac{1}{2}$ trade pkt. 30c.; 50c. per trade pkt.; $\frac{1}{8}$ oz. \$1.00.

WHITE PERFECTION. New. This is one of the best white Petunias in existence. The individual flowers measure about 2 inches across. Plants are compact in growth with abundant snow-white flowers, which completely cover the plants. Trade pkt. 50c.; \$1.25 per $\frac{1}{4}$ oz.; oz. \$3.50.

Petunia grandiflora nana compacta, Velvet Ball (Dwarf Flaming Velvet)

Bronze Medal, All-America Selections

This new Grandiflora nana compacta type is the last word in excellence for compactness, dwarfness, and free-flowering character. The plants reach a height of about 8 inches with a spread of only 8 to 10 inches, and will have a dozen or more flowers in bloom at a time, each comparatively large, about $2\frac{1}{2}$ inches in diameter, well shaped, and of a deep, luscious shade of velvety blood-red. Trade pkt. 60c.; \$1.50 per $\frac{1}{32}$ oz.

Pansies, Sunshine Art Shades

New Pansy, Sunshine Art Shades

This new strain has been developed into a very free-flowering type that blooms exceedingly well during the hot summer months. When all other Pansies have faded because of the heat, this strain will continue to give an abundant quantity of flowers. The colors are a beautiful range of delightful bright pastel and art shades, containing many unusual tints and blotches. Flowers are of a medium size and carried on long stems. An excellent new type for bedding, and the flowers prove good subjects for house decorations in bowls. $\frac{1}{2}$ trade pkt. 60c.; \$1.00 per trade pkt.; $\frac{1}{8}$ oz. \$2.00.

This is a fine-type red and white Petunia, with the white blending to golden and the red blending to very deep red in the throat. The blooms are $2\frac{1}{2}$ inches in diameter and well ruffled, with a good open throat. Plants are uniform and compact, completely covered with ruffled blooms. In addition to being unsurpassed for bedding purposes, this new Petunia, due to its fine habit and free-flowering quality, is sure to become very popular as a pot-plant. $\frac{1}{2}$ trade pkt. 40c.; 75c. per trade pkt.; $\frac{1}{32}$ oz. \$2.00.

Petunia grandiflora, Hollywood Star

Silver Medal, All-America Selections. This lovely new Petunia is a charming shade of rich rose with an amber throat. The flower is unique—it is in the form of a five-pointed star. This is a very fine garden variety, as it is early and free blooming, and the strong, vigorous plants are so smothered with blooms that hardly any foliage shows. $\frac{1}{2}$ trade pkt. 30c.; 50c. per trade pkt.; oz. \$3.50.

Petunia, Giants of California, Bodger's Supreme Florists' Strain

This new strain we believe to be the finest of the well-known Giants of California type. The flowers are very large, ruffled, with open throats, and the color strain is unsurpassed. The flowers are freely produced on strong plants which are medium tall in habit. Excellent for bedding as well as window-boxes. $\frac{1}{2}$ trade pkt. 60c.; \$1.00 per trade pkt.; $\frac{1}{4}$ oz. \$3.00.

New Single Large-flowering Petunia, Snowstorm

Phlox Drummondi gigantea, Salmon Glory

Silver Medal, All-America Selections. We take pleasure in offering this new Phlox, Salmon Glory. With its clear, clean, crisp appearance, makes one of the most beautiful Phlox combinations. Trade pkt. 50c.; \$1.00 per $\frac{1}{4}$ oz.

New Salpiglossis, Rose-Crimson and Gold

Scabiosa, Imperial Giants, Blue Moon

Honorable Mention, All-America Selections. This new type has flowers composed entirely of broad, heavy, wavy petals, eliminating the pin-cushion center entirely. In other words, the flower is literally fully double. Extremely large and deep, $2\frac{3}{4}$ inches across and 2 to $2\frac{3}{4}$ inches deep, about the shape of an old-fashioned beehive. The color is a rich, deep lavender-blue, a shade which maintains its effectiveness indoors or out. Plants are extremely upright, growing tall ($3\frac{1}{2}$ to 4 feet) and the long, heavy, yet wiry stems hold the flowers proudly erect. This is an ideal cutting type. Trade pkt. 40c.; \$2.50 per oz.

New Stock, Super Early Saint Amour

An Exclusive Michell 1940 Introduction

This is an excellent early branching type. The color of the flowers is a clear lavender-rose. This is the finest and deepest red shade available in this popular garden flower, a rich glowing crimson. The plants are a solid mass of growth, making this variety an excellent addition for bedding or borders. Trade pkt. 40c.; \$2.00 per oz.

New Zinnia, Scabious-flowered, Campfire

This is the most recent color development in the scabious-flowered type. The color is a vivid intense scarlet, one of the most showy in the Zinnia family. New Zinnia, Fantasy, Wildfire

A very vivid companion to Star Dust, Rosalie, and Orange Lady. This new variety is a rich dazzling scarlet. The plants are neat in habit, strong growing, $2\frac{1}{2}$ to 3 feet in height, and free blooming, coming into flower 45 to 50 days after the seed is sown. Trade pkt. 50c.; \$2.50 per oz.

Zinnia, Fantasy, Orange Lady

A new separate color in the Fantasy group, Orange Lady is a rich shade of deep bright orange. The medium-sized, $2\frac{1}{2}$ to 3-inch flowers are shaggy and gay in appearance, making a vivid spot of color in the garden, and extremely desirable for cutting. Of strong-growing habits, there are flowers in 45 to 50 days after sowing. Trade pkt. 40c.; \$2.00 per oz.

Zinnia, Fantasy, Rosalie

A worthy companion to Orange Lady. Color is a bright, intense rose, equally lovely in the garden or when cut. Plants are neat in habit, strong growing, free flowering, about $2\frac{1}{2}$ to 3 feet in height. The delicate, informal flowers composed of a mass of shaggy, ray-like petals are a contrast to the stiff, formal Zinnias to which we are accustomed. Trade pkt. 40c.; \$2.00 per oz.

Zinnia, New Scabious-flowered, Sunburst

A new strain with medium-sized flowers, $1\frac{1}{2}$ to 2 inches across, carried on strong stems of medium length. Plants are 2 to $2\frac{1}{2}$ feet in height, branching and free flowering. The color is a very bright, pure canary-yellow, dazzling in its intensity. Sunburst is a very showy garden variety and is particularly effective for home decoration. Early flowering, blooming 40 to 45 days from the time of planting. Trade pkt. 40c.; \$2.00 per oz.

Zinnia linearis

A very unusual and interesting new type of Zinnia. The flowers are single, in a lovely shade of golden orange with a delicate lemon stripe through each petal. Plants are quite dwarf and extremely early flowering, commencing to bloom when the plants are 6 inches tall, and are continually a mass of bloom until late fall. The plants grow 8 to 10 inches tall and spread as much as 2 feet. Trade pkt. 30c.; \$1.50 per oz.

Michell's "Distinctive" Antirrhinums

Rustproof Antirrhinum · Snapdragon

We are glad to announce that, after years of intensive work in an attempt to produce a strain of rustproof Antirrhinums, success has finally been achieved. This strain has proved noteworthy under extensively wet outdoor conditions; they have stood the tests and are better than 75 per cent rustproof. For growing outdoors for cutting or bedding, they will prove excellent. Each plant produces from 15 to 18 spikes, which are nonlateral, with flower-heads 10 to 14 inches long. They are of vigorous growth, with broad, dark green foliage and are practically immune from rust.

Aster

El Monte

Michell's Superb Asters

We wish to emphasize the fact that our Asters are grown for us by specialists, and nearly all varieties under our own supervision. **Michell's "Distinctive" Quality** is nowhere more prominent than with our Asters, and we can recommend them with the utmost confidence. Our seed is selected from plants which are free from disease.

SPECIAL NOTE.—In growing Asters, old soil and flats should never be used the second time without thoroughly sterilizing, to avoid the numerous diseases to which Asters are so susceptible. Barnyard manure should never be employed as a fertilizer. We recommend the use of finely ground bonemeal. Asters should not be grown in the same location two years in succession.

Fusarium-Wilt Resistant Strains

These we believe to be practically immune to this disease. We feel sure that by using this seed many disappointments due to crop failures will be eliminated.

SINGLE GIANT CALIFORNIA SUNSHINE

This supremely beautiful new race of Asters is the result of a direct cross between California Giant and the Dwarf Sunshine type. The plants grow 3 feet high and bear blossoms 5 to 6 inches across, on long stiff stems. The dual color-tone effects formed by the quilled discs and encircling guard petals are lovely beyond description; the quilled discs are lighter than the guard petals and as the flowers age the lemon centers turn to the color of the outer petals. We highly recommend this lovely Aster.

LARGE DOUBLE-FLOWERING PETUNIAS

The latest development in Double Petunias is the new Alldouble strain which produces 100 per cent double flowers. We offer the following selected varieties in this strain and feel quite certain that they will prove a sensation with the florist trade, especially for pot-plants for Mother's and Decoration Day.

ALLDOUBLE APPLE BLOSSOM. Honorable Mention, All-America Selections. A beautiful apple-blossom-pink. Plants dwarf, 12 to 15 inches high, covered with large, double fringed flowers. A small percentage will be of the carnation type. 1/2 trade pkt. (500 seeds) \$1.25; \$2.00 per trade pkt. (1000 seeds); 3 trade pkts. \$5.00.

ALLDOUBLE ORCHID BEAUTY. All-America Novelty. A decidedly new shade in the Alldouble Petunias. The habit of growth is dwarf and compact and flowers large and fully double. The color is a beautiful shade of orchid, which should prove very popular as it blends beautifully with the pink colors in this group. 1/2 trade pkt. (500 seeds) \$1.25; \$2.00 per trade pkt. (1000 seeds); 3 trade pkts. \$5.00.

ALLDOUBLE GAITY. Special Mention, All-America Selections. Rose-red and white, beautifully frilled. A popular color combination. 1/2 trade pkt. (500 seeds) \$1.25; \$2.00 per trade pkt. (1000 seeds); 3 trade pkts. \$5.00.

ALLDOUBLE, AMARANTH-RED. Bright amaranth-red, a new color in this popular strain. 1/2 trade pkt. (500 seeds) \$1.25; \$2.00 per trade pkt. (1000 seeds); 3 trade pkts. \$5.00.

ALLDOUBLE, CARMINE QUEEN (World Beauty). An exceptionally fine dwarf type. Beautiful rosy carmine flowers which are very double. Other characteristics same as Victorious. 1/2 trade pkt. ALLDOUBLE, LOVELINESS. Extra dwarf. Identical in habit to the popular Carmine Queen, with the exception of the color, which is a clear La-France-pink. A valuable addition to this group and especially useful to florists. 1/2 trade pkt. (500 seeds) \$1.25; \$2.00 per trade pkt. (1000 seeds); 3 trade pkts. \$5.00.

ALLDOUBLE PURPLE. 1/2 trade pkt. (500 seeds) \$1.25; \$2.00 per trade pkt. (1000 seeds); 3 trade pkts. \$5.00.

ALLDOUBLE, WHITE QUEEN. Pure white, very double flowers, beautifully fringed. Extra dwarf and free flowering. 1/2 trade pkt. (500 seeds) \$1.25; \$2.00 per trade pkt. (1000 seeds); 3 trade pkts. \$5.00.

DWARF ALLDOUBLE VICTORIOUS, MIXED. A giant mixed Petunia which produces 100 per cent double-flowered plants. The habit of growth is very dwarf and compact, the flowers large and fully double in many brilliant and fancy colorings, and it is very free flowering. An exceptionally fine type for pot-culture as the plants seldom grow more than 10 inches high. 1/2 trade pkt. (500 seeds) \$1.00; \$2.00 per trade pkt. (1000 seeds); 3 trade pkts. \$5.00; \$6.00 per 1/4 oz.; 3/32 oz. \$11.50.

The above variety is an origination of Mr. T. Sakata.

The following Double variety is a splendid strain producing an average of 60 to 70 per cent doubles.

NOTE. It is important not to discard the small seedlings, as these usually produce the best double flowers.

Double Fringed, Mixed. Superbly colored flowers of mammoth size. 500 seeds 75c.; \$1.50 per 1000 seeds

Please note, Double Petunias are a highly bred type, and the seed is not as vigorous in growth as that of single strains. Seed of all our Double Petunias has been carefully tested in soil and the germination has been found to average 70 to 80 per cent. For this reason, and because of its high cost, we cannot entertain claims on non-germination of this seed, or requests for replacements. If carefully handled, we know the seed will grow.

GIANTS OF CALIFORNIA

This magnificent new group is so marked in improvement that we believe they will head the list in florists' forcing Stocks in the very near future. Giants of California are very early flowering, with a high percentage of double mammoth flowers and have the branching habit of the Bismarck. If planted close they will nearly attain the height of the Column Stock, approximately 2½ to 3 feet. We can with confidence recommend this strain to the florist grower.

Michell's Distinctive Zinnias

We claim perfection in form, size and color for our strain of Zinnias, as those who grow them will attest.

Fantasy or Chrysanthemum-flowered Varieties

WILDFIRE. For description see Novelties, page 6. Trade pkt. 50c.; \$2.50 per oz.

ORANGE LADY. All-America Winner. A new separate color in the Fantasy group, Orange Lady is a rich shade of deep, bright orange. The medium-sized, 2½ to 3-inch flowers are shaggy and gay in appearance, making a vivid spot of color in the garden and extremely desirable for cutting. Of strong growing habits, there are flowers in 45 to 50 days after sowing. Trade pkt. 40c.; \$2.00 per oz.

ROSALIE. All-America Winner. A worthy companion to Orange Lady. The color is a bright, intense rose, equally lovely in the garden or when cut. The plants are neat in habit, strong growing, free flowering, about 2½ to 3 feet in height. Its delicate, informal flowers, composed of a mass of shaggy, ray-like petals, are a contrast to the stiff, formal Zinnias. Trade pkt. 40c.; \$2.00 per oz.

STAR DUST. Novelty. All-America Winner. This informal Star Dust Zinnia will be welcomed with enthusiasm. It has the same shaggy-petaled, medium-sized flowers as the mixture, but the color is a rich, deep golden yellow. Plants grow 2½ to 3 feet high. Free flowering and an early bloomer. This variety will come true from seed. Trade pkt. 30c.; \$1.25 per oz.

MIXED COLORS (Bodger). Novelty. The rounded flowers are composed of a mass of shaggy, ray-like petals which give a delicate and refined appearance to the medium-sized, double flowers. The color-range includes the brightest of reds and oranges as well as the popular pastel pinks and creams. Trade pkt. 25c.; \$1.00 per oz.

Zinnia linearis

A very unusual and interesting new type of Zinnia. The flowers are single, in a lovely shade of golden orange with a delicate lemon stripe through each petal. Plants are quite dwarf and extremely early flowering, commencing to bloom when the plants are 6 inches tall, and are continually a mass of bloom until late fall. The plants grow 8 to 10 inches tall and spread as much as 2 feet. Trade pkt. 30c.; \$1.50 per oz.

Zinnia, New Gaillardia-flowered • Novelty

This is another of the newer type of Zinnias, the flowers of which strongly resemble the double *Gaillardia picta*. Plants grow to a height of 1½ to 2 feet, are free flowering, and produce blooms in a color-range of many delightful combinations. Trade pkt. 25c.; \$1.25 per oz.

Scabious-flowered Zinnias

CAMPFIRE. For description see Novelties, page 6. Trade pkt. 50c.; \$2.50 per oz.

SUNBURST. All-America Winner. A new strain with medium-sized flowers, 1½ to 2 inches across, carried on strong stems of medium length. Plants are 2 to 2½ feet in height, branching and free flowering. The color is a very bright, pure canary-yellow, dazzling in its intensity. Sunburst is a very showy garden variety and is particularly effective for home decoration. Early flowering, blooming 40 to 45 days from the time of planting. Trade pkt. 40c.; \$2.00 per oz.

AUTUMN TINTS, MIXED. This new strain, which has been named Autumn Tints, is perfect in form of flower and comes true. The real beauty, however, is in the lovely coloring of the flowers, which range through all the gorgeous autumn tints and include orange, bronze, russet, dull red, carmine-red and intermediate shades. Fine for cut-flowers, having long stems and splendid keeping qualities. Trade pkt. 40c.; \$2.00 per oz.

Scabious-flowered, Mixed. Medium-sized flowers, resembling the annual scabiosa. Fine for cutting. Trade pkt. 30c.; \$1.50 per oz.

Super Crown of Gold Zinnia Mixture

Michell's Vegetable Seed Specialties

RADISH • Early Deep Scarlet Globe
Michell's Strain

In line with our usual custom, we have taken from our general list certain specially meritorious varieties of vegetable seeds to which we call, on this page, special attention. Planters will do well to include these sorts in their seed orders.

BROCCOLI • BROCOLI

Rapa or 40-Day. A very early type of sprouting Broccoli, producing many small heads. The seed is broadcast thickly, and plants cut when about 10 to 12 inches high, just before the heads burst into bloom. Suitable for early spring or fall sowing. A very fine "green." 10c. per oz.; 1/4lb. 30c.; 90c. per lb.; 5 lbs. \$4.25; \$8.00 per 10 lbs.

CABBAGE • CAVOLO CAPPUCCIO

Perfection Drumhead Savoy. A crimped-leaved sort with deep glossy green, almost round heads, and distinctly flavored. 25c. per oz.; 1/4lb. 75c.; \$2.50 per lb.

CARROT

Imperator. This new Carrot is bound to become very popular as it combines attractive appearance with first-class quality. The roots are 7 to 8 inches long and taper gradually toward the tip. They are easily pulled. The fine-grained deep orange flesh is of exceptionally mild and sweet flavor. 15c. per oz.; 1/4lb. 45c.; \$1.40 per lb.

HYBRID SWEET CORN

Aristogold. This, one of the newer varieties of golden hybrid Sweet Corns, has proved very satisfactory—tender and exceptionally well flavored and produces a heavy crop. 40c. per lb.; 2 lbs. 75c.; \$1.75 per 5 lbs.

Hybrid Stowell's Evergreen. Hybrid Corns should have first preference because of the bigger and more uniform yield and better quality. Hybrid Stowell's Evergreen is recommended for the main and late crop. Compared with the open-pollinated type it makes a better root-growth, a sturdier stalk, is disease-resistant, and a larger yielder of better filled ears. Plant Hybrid Stowell's Evergreen for your main crop. 40c. per lb.; 2 lbs. 75c.; \$1.75 per 5 lbs.

CUCUMBER • CETRIOLO

Colorado. Long; green. Very popular because of its excellent shape and good color. Exceptionally productive and highly resistant to disease. 20c. per oz.; 1/4lb. 50c.; \$1.75 per lb.; 10 lbs. \$15.00.

Early Market. One of the best Cukes for those who plant for profit, being early, uniform in shape and size, dark green in color, and averaging 8 inches long. 15c. per oz.; 1/4lb. 40c.; \$1.25 per lb.; 10 lbs. \$11.50.

Straight 8. Fine dark green color, free from white tips. Grows 8 inches long by about 1 1/2 inches thick and is of remarkably uniform straight shape. This is good for shipping or for home markets. 20c. per oz.; 1/4lb. 50c.; \$1.75 per lb.; 10 lbs. \$15.00.

ITALIAN DANDELION

Dente de Leone; Cichoria Catalogna

Newly introduced into this country and in great demand as "greens." The main stalk produces leaves resembling the broad-leaved Dandelion, but much longer. Cut and bunched same as asparagus. 25c. per oz.; 1/4lb. 75c.; \$2.50 per lb.; 10 lbs. \$24.00.

FLORENCE FENNEL • FINOCCHIO

A delicious Italian vegetable which tastes quite like celery, but is a little sweeter and more delicate in flavor. The enlarged leaf-bases are usually boiled before serving. 10c. per oz.; 1/4lb. 30c.; \$1.00 per lb.

LETTUCE

Imperial No. 44. This variety has very long, well-folded leaves and produces hard, well-formed heads appreciably less susceptible to tip-burn than other varieties. 20c. per oz.; 1/4lb. 65c.; \$2.00 per lb.

MUSKMELON

Pride of Wisconsin. A new introduction with considerable merit. The rind is a gray color with a distinct netting. Flesh is unusually thick and of very good flavor. Carries well in shipping. 20c. per oz.; 1/4lb. 50c.; \$1.50 per lb.; 5 lbs. \$6.50; \$12.00 per 10 lbs.

ONION

White Bunching. An extra-fine variety for early spring and summer bunching. Seed sown early in the spring will produce long green scallions which blanch white and remain tender for a long time. They do not form a bulb on the bottom. 20c. per oz.; 1/4lb. 60c.; \$2.00 per lb.; 5 lbs. \$9.75; \$19.00 per 10 lbs.

PARSLEY

Peerless. A fine selection of the Moss Curled type. This strain is very hardy, remains deep green when other varieties have turned yellow and is the right length for bunching. We recommend it for its color and exceptional growing qualities. 15c. per oz.; 1/4lb. 45c.; \$1.50 per lb.

RADISH

Early Deep Scarlet Globe (Michell's Strain). A special strain from transplanted roots. Very uniform in shape, color, and size. Unusually short tops. One of the best. 15c. per oz.; 1/4lb. 45c.; \$1.25 per lb.; 5 lbs. \$5.00.

ITALIAN ROCKET • RUCOLA

New type Dwarf Dahlia

Canna, King Humbert

Dwarf Dahlias

For the Garden and for Forcing

This new race of Dwarf Dahlias has created quite a sensation. They are wonderful subjects for garden planting, forming dwarf, compact plants which bloom throughout the summer until frost. The flowers, which are produced in great profusion, are seldom over 4 inches in diameter.

Three New Dwarf Dahlias

ELEANOR. A real acquisition. The 4 to 5-inch decorative flowers are produced in great profusion throughout the summer months and until checked by freezing. The plant seldom grows over 15 inches high, and the foliage is practically hidden by the brilliant orange-crimson flowers.

GERDA. Very double 5 to 6-inch lilac-rose flowers are freely produced throughout the summer and fall on vigorous, healthy plants. This variety is particularly commendable because of its superior vitality.

RUBY MAY. The plant grows to a height of about 2½ feet. Flowers are a brilliant carmine-crimson of Semi-Cactus form, 5 to 6 inches in diameter. A welcome addition to this class.

Above varieties in pot-plants only. Ready after May 1
Any of above, 35c. each; doz. \$3.50; \$25.00 per 100

CHRISTINE. Small, dainty, pure white flowers.

EASTER GREETING. The white flowers are of better form than Christine and somewhat larger, but not as early.

ELSIE. Deep golden yellow at center, passing to rich orange-carmine toward the tips of petals. Flowers are of good size and of Semi-Cactus form.

GERTRUDE. Clear sulphur-yellow flowers of good size.

KATE. Showy bright scarlet flowers of formal contour.

LENA. A lovely light pink color.

MARIA. This is a decided improvement on Easter Greeting, and has already displaced that variety largely in Europe for forcing purposes. Strong, vigorous grower and produces a superior flower.

ROSALIE. Lilac-rose bloom shading lighter toward the center.

URSULA. Intense crimson. Informal Decorative with carmine reverse. Flowers comparatively large.

Price, any of the above 3-inch pot plants, 25c. each; doz. \$2.50; \$15.00 per 100

SUGGESTIONS IN CONNECTION WITH THE GROWING OF HARDY LILIES UNDER GLASS

Hardy Lilies should be grown cool and given 16 to 18 weeks from time of planting to bring them into bloom, so the best results can be obtained; in fact, if you can give them longer to come into flower it is better. Where they are forced with plenty of heat, the result is that you get good foliage with not so many early blooms. We refer particularly to Magnificum, Melpomene, Rubrum, and Album.

Lilium speciosum rubrum

Hardy Lilies

These are excellent for growing under glass as they force readily in a moderate temperature, as described above. Prices are for shipment up to May 1, and include all cold-storage charges. After this date an additional 20 cents per case, per month, will be made for cold-storage and insurance charges.

We list only choice named and newer sorts, including Brazilian types. They cover a wide range of bright colorings and markings too difficult to describe. For summer store decoration or as pot-plants, we know of nothing finer. Start bulbs in damp moss with plenty of bottom heat and an occasional dampening. Do not allow them to get chilled, and at all times grow them in a warm, shaded place.

Ismene calathina • Pancratium Lily

Beautiful waxy white flowers, deliciously fragrant. Bulbs are not hardy and should be removed to the house in October. These sell readily as a bulb or flower, and for summer funeral work are equal to lilies. \$1.25 per doz.; per 100, \$8.00; \$75.00 per 1000.

Montbretias, Giant-flowering Varieties

Montbretias resemble miniature gladiolus, are fine for cutting, and excellent for border planting. They prefer a light loamy soil, well enriched with leaf-mould, but no manure or chemical fertilizer should touch the roots; a little bonemeal and a light top-dressing of lime should prove beneficial. They will thrive either in partial shade or full sunlight, but see that the moisture supply is good at all times.

Illustration shows the Philly Pin when on leaf. Notice how flat it lies and the firm hold it takes.

New Philly Fern Pin

A distinct achievement of real value to every florist. Easier to push in place. Easier to handle. Easier on the fingers. The bend holds the leaves firmly. No danger of leaves breaking loose as with the old-style pin. The S-shaped top presses securely on the leaf, making it stay where you put it. And they cost no more than ordinary pins. \$2.00 per 10-lb. box; 10 boxes \$19.25.

Greening or Florists' Hairpins

Save valuable time in making designs. Price, \$1.90 per 10-lb. box.
